Archiving a Learner and Future Access to the e-Portfolio for the Learner

Archiving

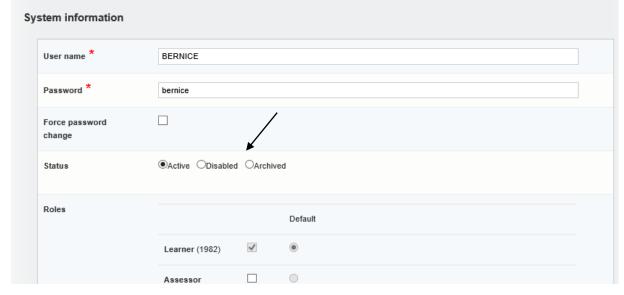

When you are ready, you can archive completed learners. This will hide all of their work from view in the system and will exclude them from any reports you run. Archiving is reversible - you can reactivate the user at any time, and then archive them again.

Both the 'archive' and 'disable' functions do the same thing. We have two options to allow you to differentiate between, for example, learners who have finished their qualifications versus learners who are taking a short break, for instance for maternity leave.

You can archive or disable the learner from here:

Or you can open the user detail and edit them from here

the learner: L24 None Country of ~ domicile Funding stream None ~ None Funding model A10 Select the degree of completion of the learning activities leading to the learning aim Completion A34 Changed within programme (5) status Complete (2) On hold (6) Transferred to new learning aim (4) On hold date Underway (1) Withdrawn (3) On hold reason None Date results submitted to awarding body Date certifcate received Date sent certificate

In the user profile, it is also possible to choose a completion status to show why you are archiving the learner:

Archived and disabled learners see own account as 'view only'

to learner

After a learner completes their qualification(s) they can continue to access their e-portfolio using their username and password even if the centre has archived or disabled their profile. This access is a view only access so they are not able to make changes or amendments to their e-portfolio.

These learners do not appear on assessor, IQA or CA reports.
