Home Qualifications Users Reports

Organisation VQM Qualification Test and QA (70)

Qualification PLTS: A framework of personal, learning and thinking skills (1181)

Minimum requirements

Centre Administrators cannot make changes to minimum requirements here. Changes need to be made by the Organisation Administrator. Please contact SkillWise for an Organisation Admin login if you don't have one.

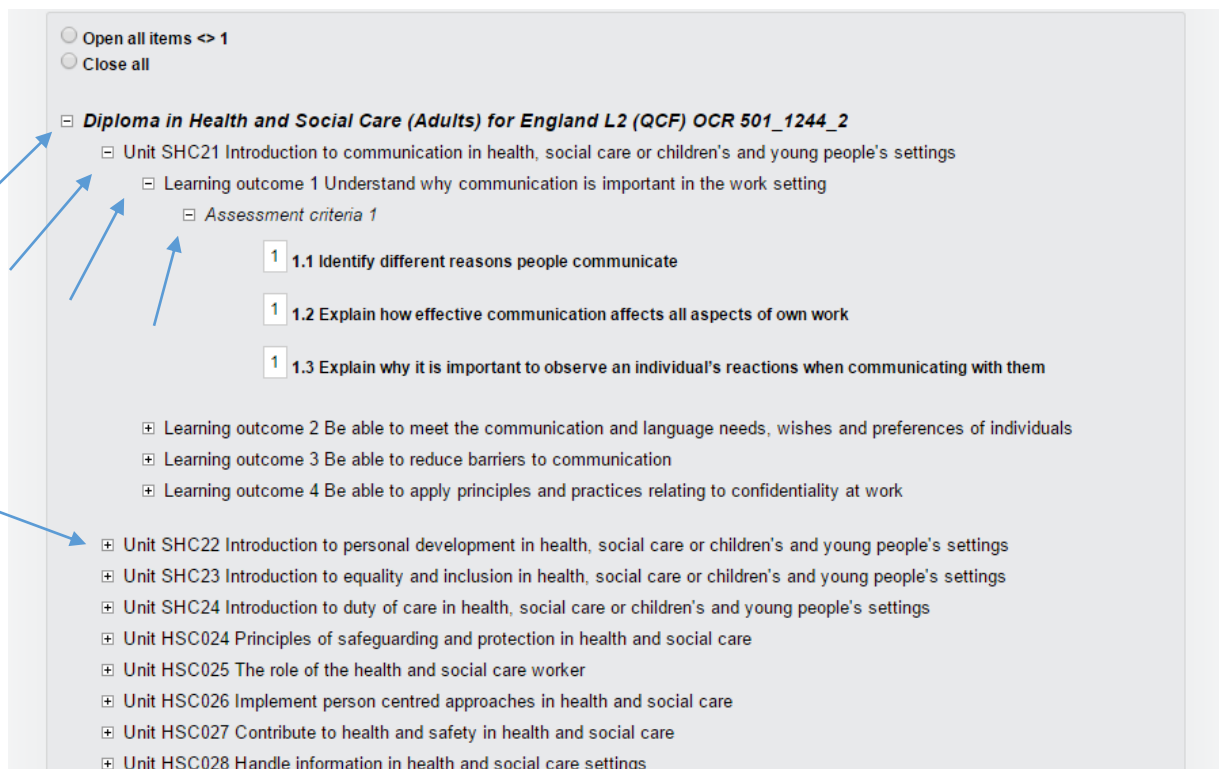

Default minimum requirements

Assessment criteria	1
Range statement	1
Knowledge and understanding	1

Specific minimum requirements

Any specific minimum requirements, if set to a value other than 1, will take precedence over the above default minimum requirements.

Scroll down the page and everywhere you see a + open up the qualification and check the unit, learning outcome and assessment criteria.

All the units for the whole qualification are always loaded and later on the units you never use can be hidden from view.

Please notify us if you see any mistakes and we will rectify these prior to the qualification being moved into your active centre.

If you are happy with all the qualifications as they are let us know and we will move them across.

Thank you.
