

## Multi Assessor Functionality

VQManager has a multi assessor function which allows for 'multi-assessor' assessment. This means that you can have two assessors work on the same evidence.

If you use the system as it is, the first assessor will need to remember to save the evidence for further work – **Save and continue later** when they are finished, so that the second assessor can pick it up, before it goes forward to the IQA. Each assessor will get their own comments box.

Assessor comments (BBB111, BBB111)

10:54 GMT 03/03/2021:  
Comments by assessor 1

Assessor comments (Flanders, Mo) (max. 8000 words)

B I U G " ↻ ≡ ≡ Normal : A ✖ Ix

10:55 GMT 03/03/2021:  
Comments by assessor 2

7/8000 words

The 'multi-assessor' function adds buttons for each assessor to indicate if they are happy with the evidence or not, and adjusts the wording on screen to help assessors.

Assessor comments (Smith01, Anne) (max. 8000 words)

3/8000 words

I am happy with this evidence. It can be passed on for verification

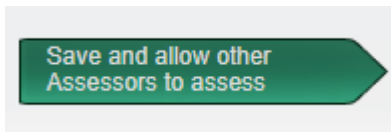

I would like this evidence to be returned to the learner / trainee assessor for action

Save and submit for verification Return to Learner for action Save and allow other Assessors to assess Cancel

I am happy with this evidence. It can be passed on for verification and  I would like this evidence to be returned to the learner / trainee assessor for action

This will let the second assessor know that the first assessor has seen the piece of evidence and their feelings about that evidence.

The **Save and continue later** is replaced by **Save and allow other Assessors to assess**

If this is switched on, it will affect all assessors and all evidence in your centre. There are no cost implications to this choice.
