# Adding note to Log evidence screen for learners

This is a centre option and therefore not automatically added to your centre. If you would like it to be added, (there is no cost), just get in touch and we will discuss the wording for your organisation specifically.

This development has come about due to the number of learners creating a brand new piece of evidence when work is returned to them, rather than editing and resending the original piece.

The Log evidence tab is re-named to Log new evidence for all users, and all centres.

A warning message can be added at the top for learners when adding a new piece of evidence. The below is just an example of some wording, yours will be specific to your organisation.

"You should only continue if you are submitting completely <u>NEW</u> evidence. If this is a resubmission of previously reviewed evidence, please go back to your To do tab, and send your resubmission in by clicking on 'Rework' on the existing piece of evidence".
