# **Using Assessment Plans**

#### **Assessment Tools**

### View, edit or apply assessment plan templates

This tab shows assessment plans that have been created for the qualification you are qualified to assess.

It also show assessment plans you have created that are not linked to assessment criteria.

### Types of assessment plans:

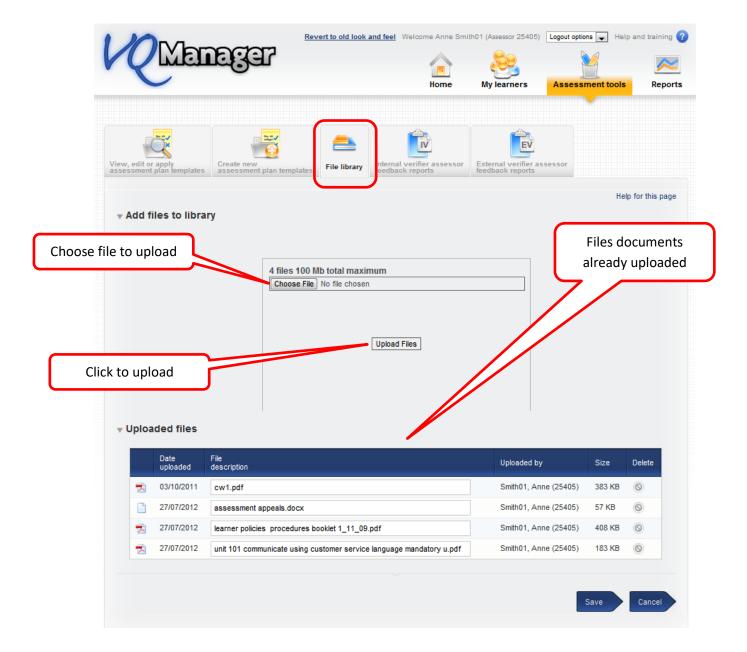

- Assessment plans linked to qualification these plans are used for assessment
- Assessment plans not linked these plans are for everything else, induction activities etc. policies and procedures

Remember – the way to communicate information to learners is through the assessment planning process

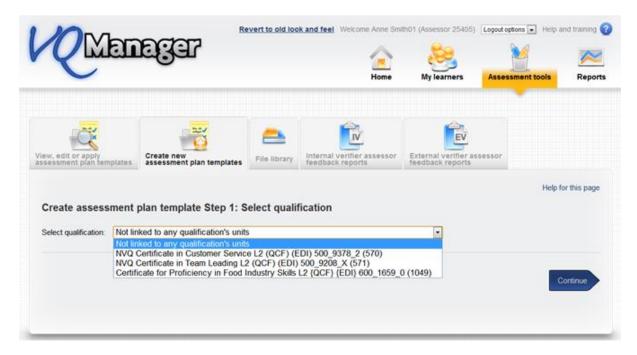

### **Creating assessment plans**

### File library

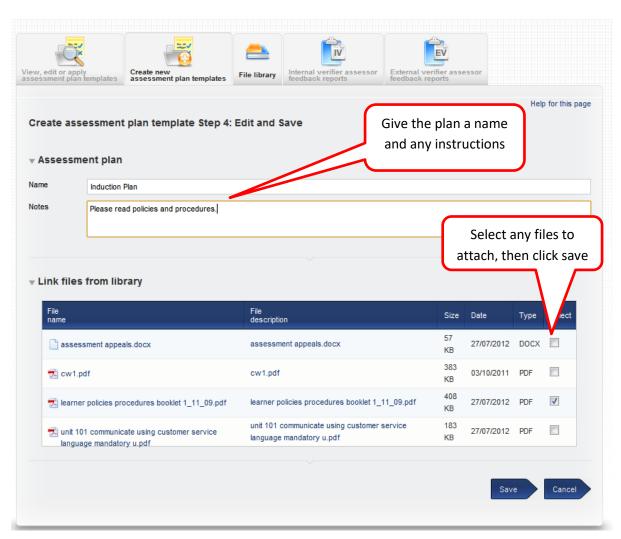

If you want any document/file/resource to go to learners in the assessment plan process they have to be in the file library:

# Create new assessment plan template

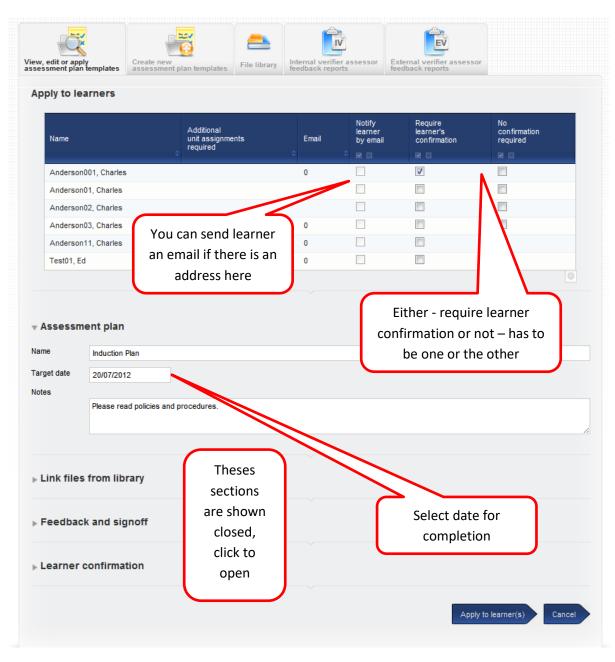

#### Plan not linked to assessment criteria:

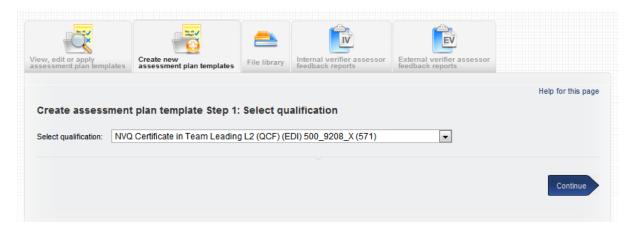

# Make sure plan is selected – apply to learner(s):

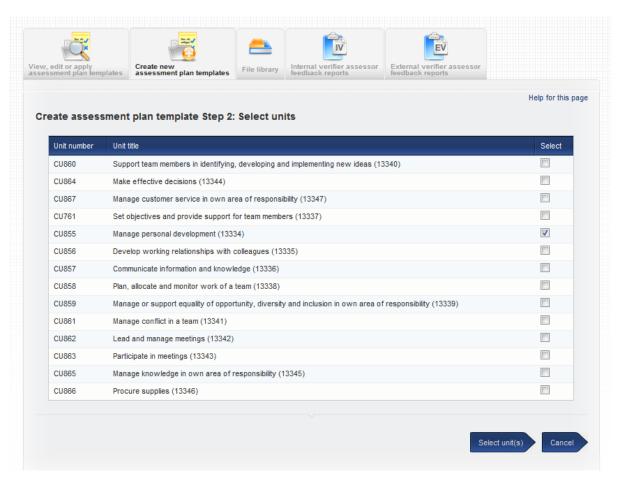

#### Plan linked to assessment criteria:

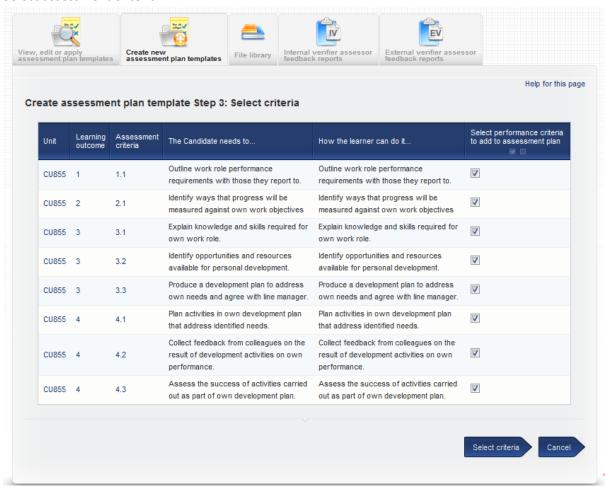

# Select qualification:

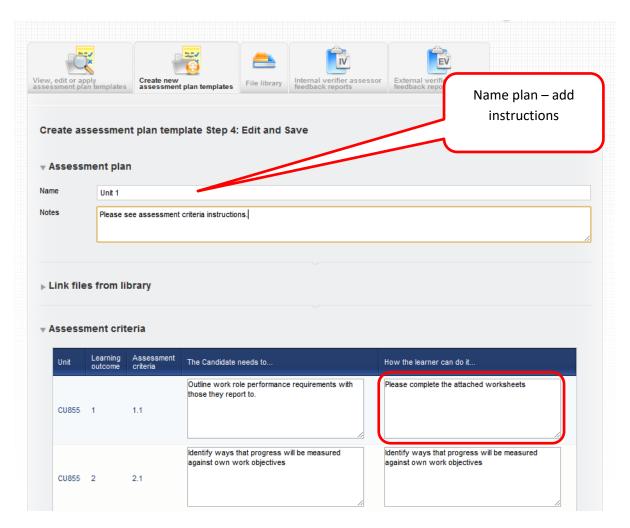

# Select unit(s):

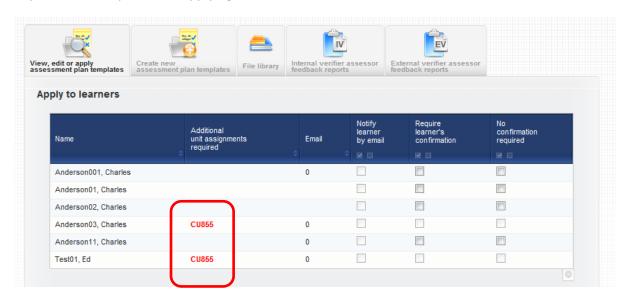

#### Select assessment criteria:

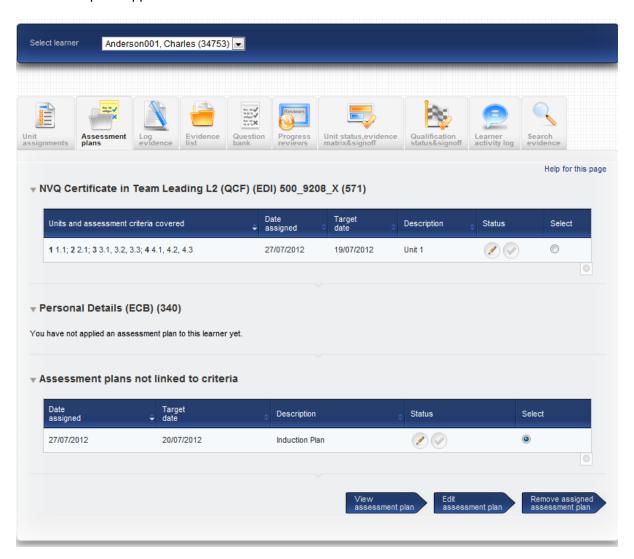

Assessment criteria can be reworded.

Repeat the same process of applying to learners:

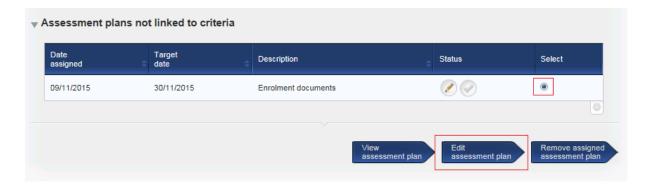

If units appear in red as above, this means the learner is not doing these units and the assessment plan cannot be applied – you will need to change add the units in Unit Assignment TAB.

Assessment plans applied to learner:

# Ability to upload ad hoc documents to assessment plans

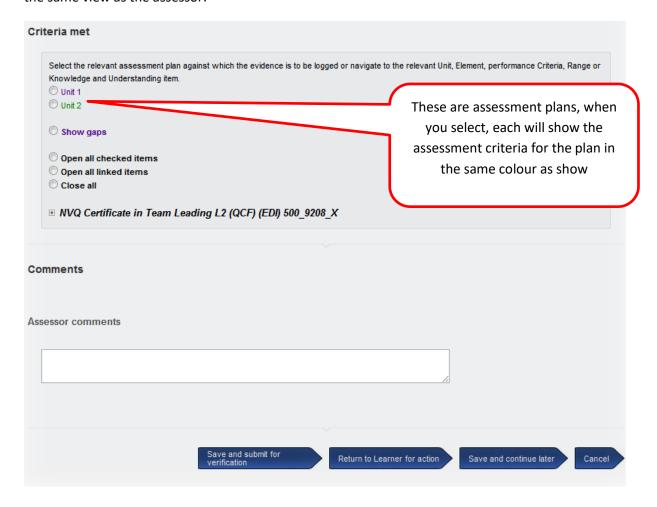

Assessors are now able to add documents directly to assessment plans, without uploading them to the File Library first. This option is **only** available after the assessment plan has been assigned to the learner. Assessors will need to click on My Learners and the Assessment Plans tab, select the learner in the drop-down at the top of the page, and select the Assessment Plan using the radio buttons. They should then click on 'Edit assessment plan' at the bottom of the page.

In the plan, there is a new section for files uploaded specifically to this plan for this learner, and also a section that allows the assessor to browse and add files.

### Working with assessment plans

Assessment plans can be applied and sent to learners to work towards until complete. However assessors can also use assessment plans when logging evidence if assessor view of assessment plans is switched on. When you go log evidence, assessment plans are listed in different colours – this is the same view as the assessor:

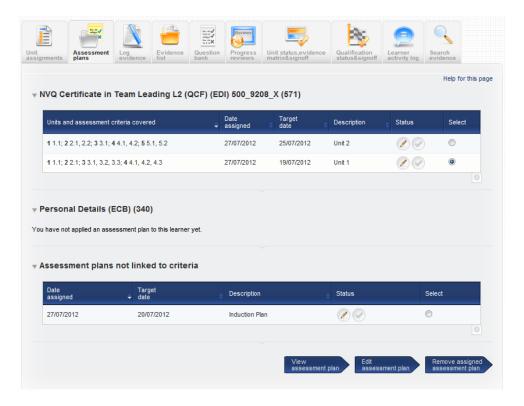

● Unit 1  □ Unit 2

Assessment criteria 5 ☑ □
5.1 Identify potential work-related difficulties and conflicts of interest.
5.2 Explain how to resolve identified potential difficulties.

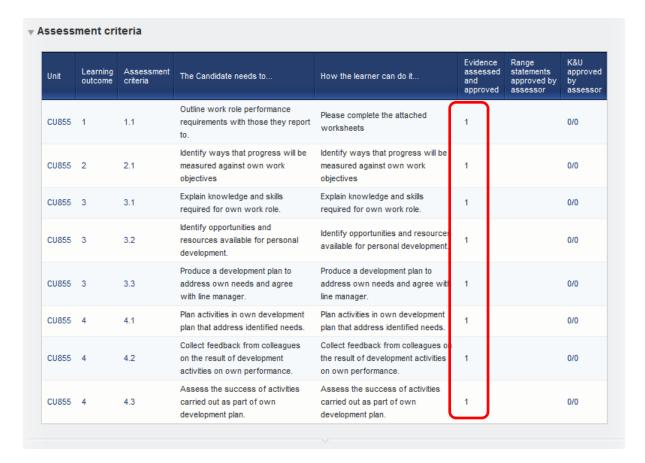

# Signing off assessment plans

To check that assessment plans have been completed:

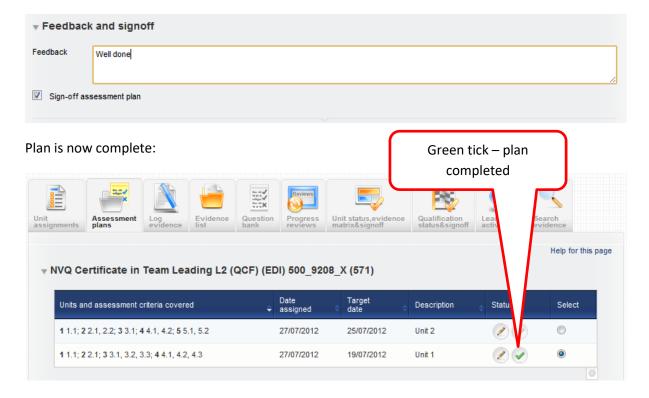

Make sure assessment plan is selected and click Edit assessment plan.

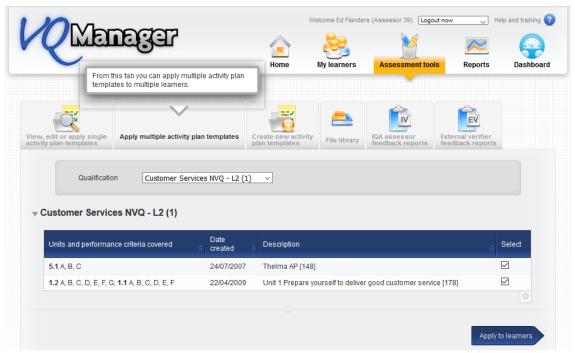

As long as there is at least '1' against each assessment criteria then the plan has been completed and is ready to be signed off:

Click on the feedback and sign off:

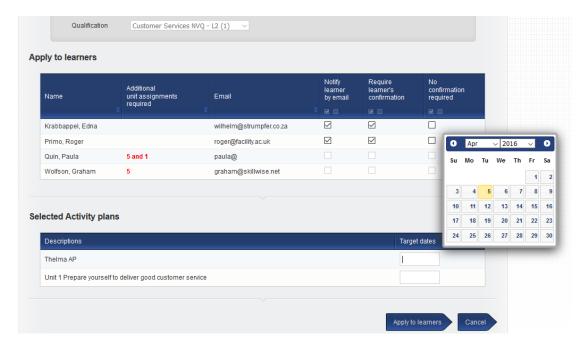

### Assigning multiple assessment plans at once

We have added a new tab to the Assessment Tools area called 'Apply multiple assessment plan templates'. (This could read activity plans or action plans depending on your centre settings).

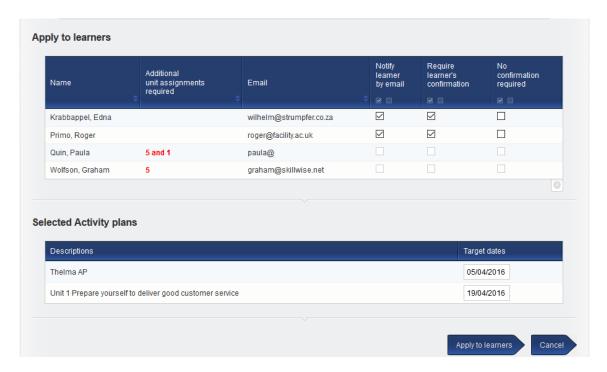

This tab will offer a drop-down to select a qualification, or not linked to criteria, and display the list of assessment plan templates for that qual. Users will not be able to select plans from more than one qualification at once. The assessor then ticks the required assessment plans in the "select" column.

When the blue arrow "Apply to Learners" is selected a new tab with a table with a list of the assessment plan titles appears with a box for each assessment plan target date. There is no "Notes" section at this stage. The notes are already on the template when you create it, and if necessary you can write notes on individual plans after you've assigned them.

Select the learners and complete the target dates before selecting the blue arrow "Apply to learners"

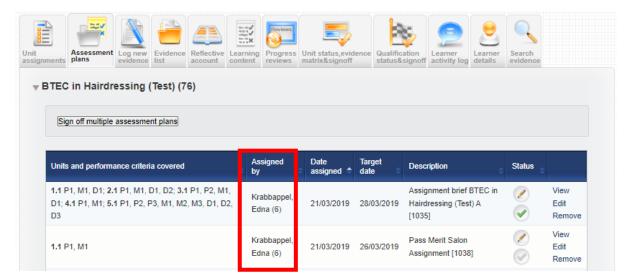

A pop up appears to confirm the plans have been assigned to the learners. The target dates will be the same for all selected learners.

# Add assessor name to Assessment plan table

In the **Assessment plans** tab, we have added the name of the assessor who assigned the assessment plan into the summary table. This will assist learners in knowing who to ask if they have a question about the plan.

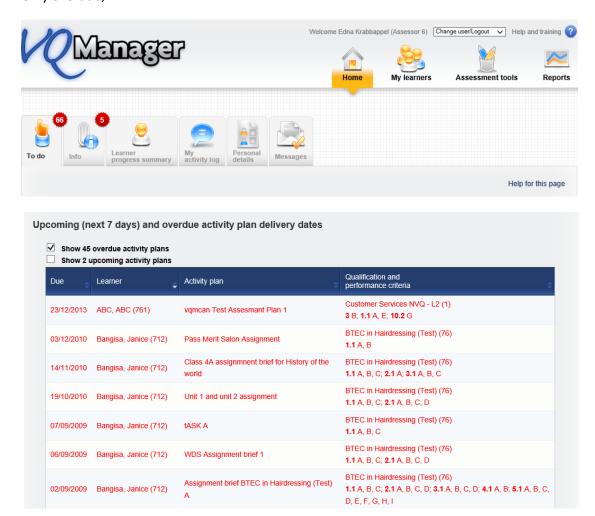

### **Assessment Plan Notifications**

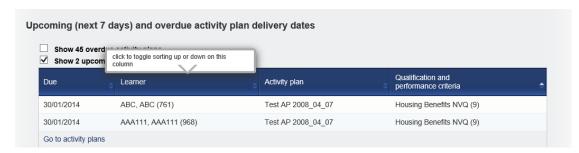

Assessment Plan notifications are an optional feature for your organisation's centre.

The assessor is notified of all assessment plans allocated to the learners by way of a new table in the To Do tab. You can group all assessment plans by date, by learner and also by qualification too. This table also has the additional functionality of allowing assessor to select:

# Only overdue;

# Only upcoming;

### All plans on list.

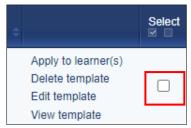

### Allow bulk deletion of assessment plan templates.

Assessors are now able to delete assessment plan templates in bulk. This is useful to clear up old templates that aren't being used any more. Assessment plans assigned to learners are <u>not</u> affected by this – the function only removes templates you won't be assigning to learners in future.

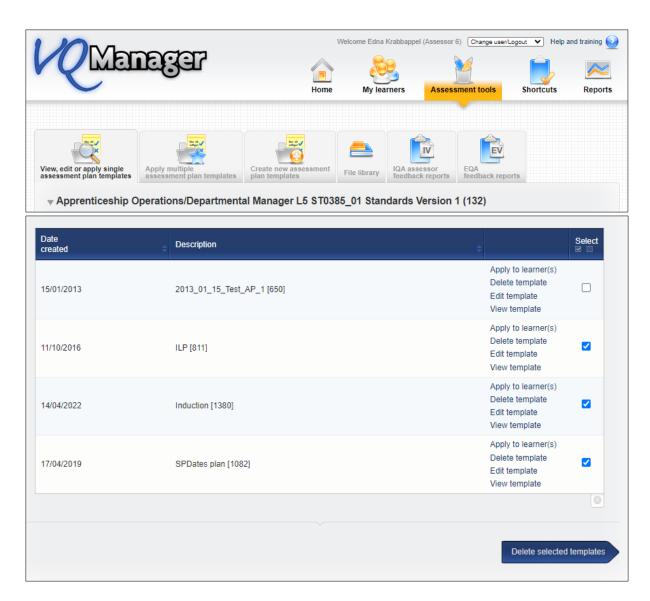

On the View, edit or apply single plan templates tab, you could previously click on "Apply" "Delete" "Edit" and "View" to complete that action for that specific plan.

This new function allows assessors to select several plans using the new tick box and delete in one go.

There is also the usual "select all" option in the blue area within the table if required:

After selecting which templates they'd like to remove, the assessor clicks the **Delete selected templates** button at the bottom of the page.

When you select this button, a pop up appears to double-check your decision. Click **OK** to delete, **Cancel** to return to the page.
